

Mapping and recycling of marine litter and Ghost nets on the sea-floor The “marGnet” project

Co-funded by the European Maritime and Fisheries Fund of the European Union

This project has received funding from the European Union's EASME-EMFF funding programme – Sustainable Blue Economy Call under grant agreement No EASME/EMFF/2017/1.2.1.12/S2/05/SI2.789314

Aims of the project:

REDUCE ML

By promoting sustainable practices and capitalizing the results of previous projects

RECYCLE ML

By engineering a prototype to transform ML into an energy source using low temperature pyrolysis

DETECT ML

By mapping the sea-floor and developing prediction models

PROMOTE

By providing decision support tools and examples of best practise to policy makers
